

TABLE tag (ArUco 4x4_50, id 0, 150 mm) - do NOT cut this page

Tape the WHOLE sheet flat on the table, beyond the far edge of your workspace, rotated so that you can read this text normally from where you sit. This fixes the axes.
It must stay fully visible in every frame: never put objects or your hand over it.
Measure the black square after printing; if it is not 150 mm, tell Claude the real size.

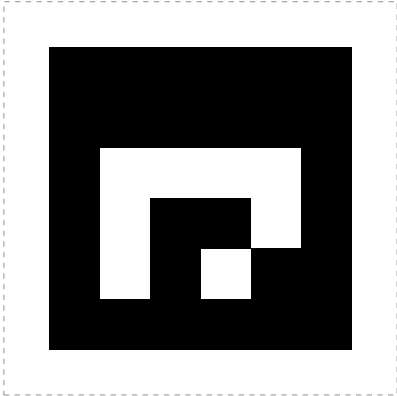

This bar must measure exactly 100 mm. If not, reprint at 100% / 'Actual size' (not 'Fit to page').

OBJECT tags (cut along the dashed lines)

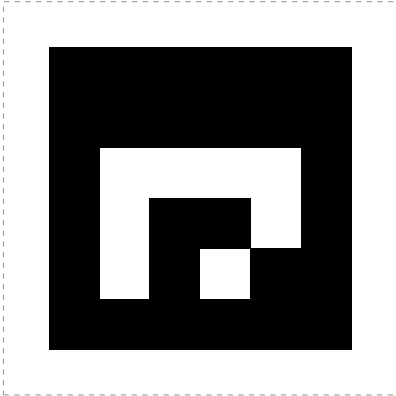

BOWL: tape ONE bowl tag flat on the bowl's inner bottom (id 1 = 40 mm; use id 3 = 30 mm if it does not fit).

PLATE: tape the plate tag (id 2 = 50 mm) at the plate's centre.

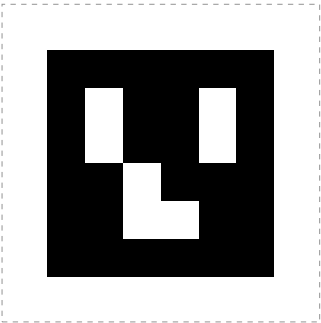

The tag id tells the code its size, so do not swap sizes. Spares included.

BOWL id 1 40 mm

BOWL id 1 40 mm

BOWL-small id 3 30 mm

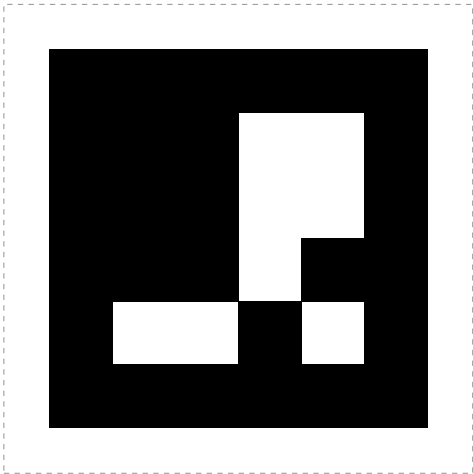

PLATE id 2 50 mm

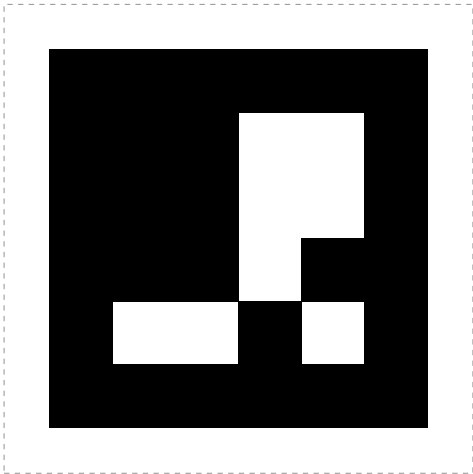

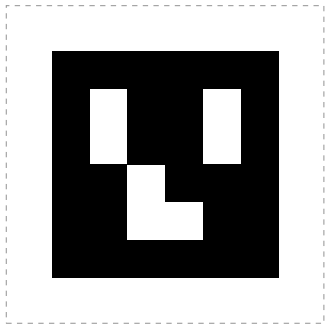

PLATE id 2 50 mm

BOWL-small id 3 30 mm

This bar must measure exactly 100 mm. If not, reprint at 100% / 'Actual size' (not 'Fit to page').
